

Peterbilt twin steer tri drive picker truck in HO scale

Posted by oldtruck56 - 26 Feb 2010 18:43

This has been on the table since September of last year, and I finally finished it off. Major kit bashing involved in this one with parts from a Kibri crane, Norscot Peterbilt 389, Athearn truck frames and lots of scratch parts. The trailer is two Athearn van trailer frames with basswood decks and some brass rod, and lots of plastic sheet. The little locomotive on the trailer is from Jordan Miniatures and is an HO scale Mack 15 ton switch engine that will go on display in the Railroaders Memorial Park on my HO layout.
