

New additions from First Gear and Norscot

Posted by oldtruck56 - 08 Apr 2010 15:48

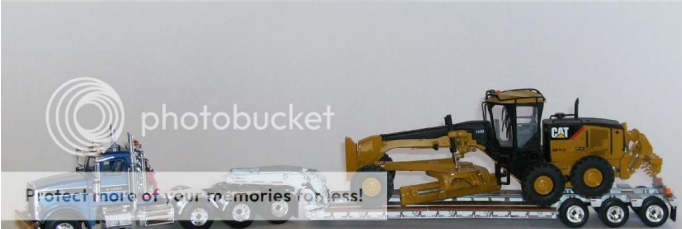

Picked up some new additions to the 50th scale collection over the last couple weeks. First to arrive was the First Gear Peterbilt 367 tractor with Talbert lowbed trailer. The trailer is the real star here, with removeable gooseneck, working ramps and outriggers (see pic for explanation). Comes with wide load signs, beacon lights on tractor and trailer and a tool to help open the outriggers.

The tractor has opening doors and tilting hood, but needed chains, binders and some decal work...

Here's the trailer with a Norscot Cat 14M grader to show how the outriggers are used with loads wider than the trailer bed.

and the the headlamps and the 967 with a

front

That looks fantastic and the decaling does set it off nicely. All in 1:50 too. Nice

The pull trailer for the end dump comes out in June, a ramp trailer for a back hoe or small track hoe. It's on pre-order, I haven't decided on the hoe yet. Norscot makes a side shift Cat 410 I think it is and a 308 track hoe that will both fit on the trailer, so I just have to choose which one.
