Nice addition to your collection. I don't collect SuperKings and have not seen these before.

Neither have I. Did you have the boxes too?

I have a few Superkings, but only those with these rims. Something about them. I just love the way these wheels look on so many of these Matchbox. They come reasonable, so I tend to grab one now and again when they pop up but I have never seen this Audi. It looks mint.

Nice finds indeed !!!!!

The white Audi which I had been looking for thirty years was found by my buddy in the UK. It came with the original box. Long search over. I have two in Silver. below is the link to Nigel Gent's webpage with my contribution.

The beige Porsche was a fluke. I did not know this one let alone the 'buy one get one free' combo.

Got a couple in silver, and a red one missing the hatch.

Again added to a page on Nigel Gent's site
