

James Young Sedanca Coupé

Posted by Ecclesley - 08 Feb 2017 06:18

This 1958 Rolls Royce James Young Silver Cloud I Sedanca Coupé, chassis # LSFE99, is one of two ever built. These two are undoubtedly the most gorgeous Sedanacas ever produced by any Rolls Royce coach-builder.

The car was bought new by Rudolph Light of Nashville, TN. It was then sold to New York surgeon and Rolls Royce enthusiast, Dr. Samuel L. Scher. After his retirement to Palm Beach, Florida the car was sold to his neighbour and ultimately being acquired by a private collector. Another striking feature of this car is the glass hood ornament, "Spirit of the Wind" designed by famous French artist René Jules Lalique; illuminated when switched on. And also dummy landau irons.....

The model shown is by True Scale Miniatures and it arrived today.

that's cool to have a bulb on the bonnet.

very pretty model
