

My own diecast book

Posted by Keesie - 03 Jul 2017 17:05

Some of you might know I had two books made of my models. When I restore I always take pictures from what's on my workbench.

There are several companies here, and no doubt in other countries as well, which are specialized in making photo-books and such. With the shop I choose, you download a program, and you can place pictures in it. You can then manipulate with them and when done, you go over to the next page. You can store the whole thing, to come back to it later. I suppose there are people who choose a holiday or wedding for this, I choose my models. I had a book made in 2010, and the next one was done in 2014. So every now and then I added models to the book, until I filled 48 pages, like the other two (you can choose as many pages as you like).

Today I uploaded the information to the site for my third book. I am very excited, and hope to receive it at the end of the week. Here a picture of the previous two. I have them done on A4, hardcover. The price including shipping comes to about an euro per page.
