To answer your question, NO Trudeau was not elected due to this boys Death or anything at all related to the European crisis. That is there's to manage.

Trudeau was elected on his fathers record, he being a former Prime Minister of Canada and the fact that the country was sick of the corruption of Steven Harper and his view of Canada as his own little fiefdom of Harperville. The country was sick and tired of the Conservatives and said so with a Liberal Government. Next it will be this fall, another election and you just watch, NDP will be in power and then we will all be in trouble, like you but worse as they like to drain the bank and borrow with no sense of paying it back.
