

My Technics turntable

Posted by RoutemasterNL - 19 Jan 2019 07:43

Triggered by Keesies article about his turntable, I went to the attic to find the one I still have, but don't use anymore

Hi CCE, did you know Ekseption? They were a rockgroup from the late sixties, and a few members: Rick van der Linden(piano/keyboards) and Rein van der Graaff (trumpet) were highly classical educated. They both passed away. At that time they were compared to ELP. They took pieces of classical composers (Bach, Beethoven) and turned them into rock. Their best ones are The fifth, Sabre Dance, Air, Peace

planet, Rhapsody in Blue, Adagio, Italian Concerto, Ritual fire dance and more. Try this:

They also did a concept album called 'Beggar Julia's Tipe Trip'. A very special song on there is 'Julia', see:

I don't think I've heard of that band before.

But they seemed like a nice bunch of guys that knew how to have fun.

Thanks for the info.
