

Another Corgi Transporter

Posted by Keesie - 29 Jun 2019 16:00

The past few days I finished several transporters. These are composed out of several models. Here a transporter with a Carrimore cab and Chipperfields trailer.

It can be filled with various models. Here some Volvos and Corvettes.

I like the way you combine truck and trailers that did not come that way and make a whole new product

from them. Great stuff and looks really good with the cars. Next you could make a lumber load out of Popsicle sticks or the like. Just cut the rounded ends off and bundle them in loads. That would suit this truck well. Some elastic bands or some sort of ties to hold the load down would make it look authentic.

These are very nice combinations Kees. The metallic blue suits the tractor and the white rear fenders really finishes it off.
