There may be a member here who will know what brand this is but it is hard when they are made in China. Maybe the logo beside the ®

will give a clue. Interesting that the 3 is backwards on the base but the rest of the numbers are the right way.

Maybe this will help.

Hi and welcome to the site. What do you collect?

Never seen this car before so I can't tell

This is one of about 22 models from Globalway International. The 931 is the item number. The large logo near the small copyright logo is the original logo for the manufacturer in China. I think Globalway borrow it for some of the packaging.

Well, we found the answer thanks to Rollerman. Tip of the hat to you.

That is a nice display of 81 Matchbox models. What is missing from slot 38, if I may ask?

I don't think you will get an answer to that Jim. I wonder.....

No, probably not but I still try to get new members to contribute, no matter how small the contribution.

That would drive me absolutely crazy to look at such a nice display case with just two empty spots. hahahaaha i'd be on a 24/7 mission to get them. That's the collector's OCD in me I guess 🙄
