

Dinky 25BJ Peugeot Van Mazda

Posted by RoutemasterNL - 16 Feb 2021 18:08

Jacques Dujardin from France asked me to post the following:

I have heard that there is a casting variation on the 25 bj Peugeot Van "MAZDA" the rear rivet post seem to have been enlarged sometime probably because the alloy did not seem to fill the mould enough. Would you have any pictures of an open MAZDA model showing this spigot? This variation applies to the Mazda only and not to the Poste which is a later model
