

2 tone Dinky Honest John Missile Launcher

Posted by RoutemasterNL - 23 Feb 2021 19:11

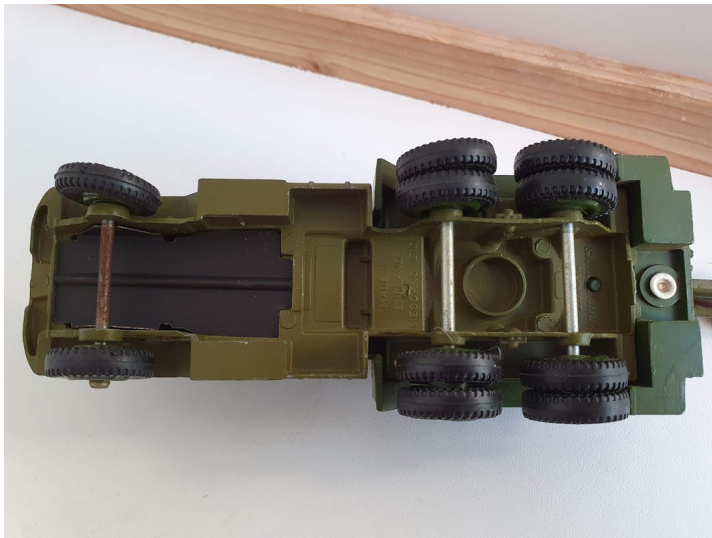

Question for you all: the model looks original to me, but there seems to be a difference in the green use for the launcher and the truck.

Is that an error on Dinkys part or?

Did you also notice the melting of the hubs?

Just looking at Jacques Encyclopedia (all Dinky Collectors should have one) and he show this color variant along with some others. Dark Green launcher bed with light green missile launcher and cab & chassis. He says it is the last issue but should have a grey missile and no decals. Also the launcher bed can be black with the rest being military green. The red over blue badge is for the R.A or Royal Artillery. He has no idea what the yellow triangle on red back ground is supposed to mean. Hope that helps.
