

Gear Box Peterbilts

Posted by oldtruck56 - 25 May 2009 19:26

Got 2 of these in the mail, both broken and missing parts. tractor is being customized, this one will be stripped, repainted and have mural style decals running from the sleeper back to the end of the second trailer.

So what scale is this one. Will it fit in with your set up and diorama? Looks like a good project for you. Jim

This is 64th scale, too big for the layout, this one is for the shelf. Not much customizing to this one, fix the casting and a repaint. The other tractor is getting the full treatment, cab and frame mods and some custom parts.
