

Majorette 600 series 1/87 scale Kenworth

Posted by GunnerJim - 23 Jan 2012 01:41

As the box has been opened before it wont matter will it.

Extremely good looking rig in detail by Majorette and I like the wheels they are good by design.

A different angle showing the finest in detail especially the decals on the tanker trailer.

Some of the other model or toys if one wants to give them that label.

This Kenworth is a bit rough around the edges through having a rough play life. But that's what toys are for I think.

yes... got a couple myself.

ok, am home now and taken some photos of my trio I've had since the mid-nineties.

The Coastguard helicopter bought separate but it fits well. The other one with the helicopter is original.

And ofcourse an orange Gulf Tanker.

These trucks have remarkably good details despite their vintage.

Thanks for adding you Majorette trucks Richard as that adds some more information regarding the 600 series into the TC dimension.

sure thing mate, still got loads more...

the Coastguard helicopter has retractable gear.
