

Playart 1/24 Porsche 911

Posted by Baskingshark - 20 Aug 2009 18:29

I already had the Police version of the 1/24 Playart Porsche 911, but I just got the standard road-car version. Unfortunately, there's a factory defect on the rear suspension, which I need to see if I can fix without taking it to bits. Still displays nicely though and is a great colour!

That is a nice Porsche/ nice color too. Limeish green but darker by far. I like all the opening

features. Is the motor compartment very detailed? and what is in the front bonnet?

Jim

oh gosh, I second the motion.

Appears to be a little bit simpler than the Bburago version, but still a treat to see.
