

Entex Rolls Royce Phantom III

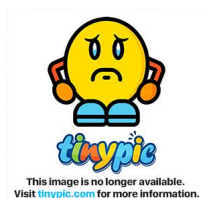

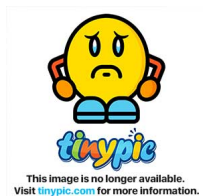

Posted by Ecclesley - 01 Nov 2014 03:57

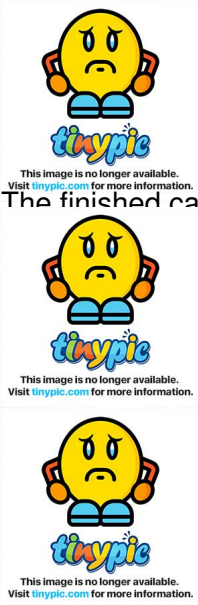

Having just finished the Italeri Phantom II plastic kit, see other thread. I am gonna proceed with building a 1:16 scale 1937 Phantom III by Entex. The same kit was also produced by Revell, Anmark and Gunze Sangyo.

I have this kit lying around for almost 3 years now and I only assembled a part of the engine and then lost heart.

But as the Italeri build did me good, I am gonna unearth this kit and start cracking. Might take some time to finish it. This is quite a job.

The pictures below show the box, as bought, in a very derelict state, but the contents is okidoki.

The finished car should look like this (or any other colour)

I also ignored facebook for many years because of the stories you here but my model club commitments meant I had to get involved and now with my Rolls-Royce group shown above I can say facebook has settled down now and is so populated with model collectors and different model groups for all aspects of the hobby.

It is the easiest platform I know regards posting messages and pictures and after running my group for some months now I wish I had got involved with facebook earlier so both parents could benefit from the interesting groups I have found there, especially a long lost railway down in North Devon where we used to live.

I am not forcing anyone to join facebook and posted the link for the benefit of "RRENTHUSIAST" so we can communicate with each over so easily.

I used to have the instructions of this kit, but I just can't find them anymore.

I have mine handy and can run off a few copies for those that need insructions for the Entex version.

Thank you all for your replies, I thought posting here may be a bit of a long shot, but now I'm getting really hopeful!

@Rollerman: Your Facebook group looks quite interesting, but I'm afraid I have't got a Facebook account. I did many years ago, and it was not a happy experience. Great to hear that you still have the instructions. Would it be possible for you to send me a copy of the instructions by email? I can send you my email address by PM.

You can try and send me an email address via this forum's message system but don't be surprised if problems arise and I never get it!!

Thanks Rollerman. I just sent you a PM. Could you please let me know if you have received it? If not, I'll try to think of another way to get it to you.

I wold try the Community tab above in the red bar, click on Members and enter THEROLLERMAN in the search box. From there you can send a message. I assume you have been using the word box on the right under the user avatar in this thread. That does not always work.

Jim
